

# ACCOUNT UPDATER

## Avoid Lost Sales and Delayed Payments.

Take the tedious work out of updating your customers' vaulted card information with MX™ Merchant Account Updater.

The Account Updater App automatically updates vaulted customer card account details, keeping payment information current, eliminating the hassle of manual updates.

Merchants will quickly see a reduction in declines, cost to manually update card data, and risks associated with staff handling sensitive card information.

Activate Account Updater today to save time and keep payments flowing seamlessly.

### HOW IT WORKS

All vaulted customer card account numbers are sent daily to the card brands, including: Visa, MasterCard and Discover. The card brands then send updated information if changes exist and the updates are then automatically applied to the customer's vaulted card. MX™ Merchant Account Updater will sync a customer's new account number, expiration date, closed account, etc., and a reason for the update will be provided.

### REPORTS

MX™ Merchant Account Updater reports displays information about the cards that were changed, the reason for the change, or if the merchant needs to contact the customer.
